

**Gardening**  
**Gardening Technician – 3 years**

**Objective**

To adapt the training of university technicians to the technical needs of the area connected to the planning, execution and maintenance of gardening works.

**Contents**

The syllabus is made up of 22 subjects to be attended in a lapse of 3 years. In order to obtain the degree, students are required to pass a Final Paper. In this course of studies, students acquire basic knowledge of Botany, Climate, Chemistry and Soils. The rest of the subjects are oriented to the design, execution and maintenance of gardens.

**Job Opportunities**

Graduates are qualified to carry out projects of gardens: direction, execution and maintenance. They possess the scientific, technical and aesthetic knowledge that allows them to use the existing technology and art conceptions and transfer them to the design, execution and maintenance of gardens.
